## Luna Biometric Fingerprint Reader

The Luna is our highly secure, highly rated fingerprint reader, bringing you the power of an automated time & attendance terminal with integrated biometric technology, at a great price. The Luna is compact in design and easy to use. It allows the user to clock in & out with the touch of the finger. The user also has the option of viewing their last recorded time, transferring departments, or even entering other information like tips, miles, etc.

The large LCD provides maximum readability, and the on-board speaker provides audible and verbal confirmation of a complete or incomplete transaction. The Luna also comes with an internal bell scheduler allowing you to use the internal speaker to signal common start, end and break times. In addition, data can optionally be downloaded directly from the Luna, via a USB disk drive making the Luna great for locations without physical connectivity.

The Luna comes standard with two easy ways to connect to the InfiniTime Labor Management System. The Luna comes standard with a TCP/IP Ethernet port for communication across a network. The Luna also comes equipped with a USB connection. In addition you can download data via an external USB thumb drive. The Luna comes with all three options at no additional cost, so use the best connection for you!

### how it works

The Luna uses the latest in advanced biometric fingerprint technology. Features like the all new anti-seismic design, make operation and fingerprint recognition more accurate & efficient.

The user simply places their finger on the green lit optical sensor. The fingerprint is then scanned and compared to all fingerprints on file using a highly sophisticated method of measurement. In under two seconds the identity is confirmed, the punch created and vocal confirmation made.

The data collected by the Luna terminal is then sent to the InfiniTime Labor Management System. With InfiniTime, detailed reports can be generated, exceptions tracked, and data passed on to payroll for check processing.

### features & extras

- Can read any fingerprint! (Not limited to the index finger)
- One year parts and labor warranty
- Optional backup battery available
- Large backlit display for easy operation
- Alarm indicator for full memory or other errors
- Optional internal bell scheduler
- Interactive menu for completion of complex tasks
- Real time labor data collection for constant updates
- Store 30,000 user transaction on-board
- Connect to InfiniTime via USB or TCP/IP Ethernet
- Download data to a USB disk drive
- Audible speech confirmation via internal speaker

# LUNA

## save money

- Replace badges with fingerprint identification
- Save time with pinless entry
- Reduce overtime by locking out early punches
- Sealed keypad reduces maintenance costs
- Reduce labor management time with realtime data

## increase productivity

- User identification at the terminal in  $\leq 2$  seconds
- Department transfers done in one transaction
- Employee can view last recorded time
- Quickly enter miles, tips, commission etc.
- Touch and go system insures better accuracy
- Anti-seismic design for better scan accuracy
- Linux based operating system for reliability
- Quick audible verification of transaction

## expandability

- Choose to use direct connect or TCP/IP Ethernet
- Add multiple terminals for additional users
- Capable to handle an unlimited amount of users
- Use in combination with any of our product line
- Optional backup battery ensures operation

## connection methods

- Internal 10mb/100mb TCP/IP connection ready
- USB Connection Port
- Download data via USB Drive!

## applications

The Luna holds 1,500 employees and 30,000 punch transactions, making the Luna fit for any size organization. Pinless fingerprint identification technology makes the punching process quick and easy, capable of handling large groups of employees fast and accurately. The Luna can also download time & attendance data directly to a USB disk, for transfer to the InfinitiTime Labor Management System.

With two different connection methods and the two ways it collects data, the Luna fits in to the infrastructure of most organizations. The Luna is one of only a few business purchases that pays for itself in no time at all!!!

## technical specifications

**Size:** 7.5" (width) x 5.5" (height) x 1.5" (depth)

**Weight:** 2 lbs

**Display:** Character LCD, 128 x 64

**Power:** 2A / 5 VDC

**Operational Temperature:** (0°C to 45°C)

**Fingerprint Verification Time:**  $\leq 2$  s

**Memory Capacity:** 128 Mb Flash Disk

**Transaction Buffer:** 30,000 Transactions

**User Capacity:** 1,500

**External Ports:** USB, TCP/IP, USB Out

**Operating System:** Linux

**LED Indicator:** 2 Array LED Indicators (Red, Green)
